

AN ESSAY ON SCIENCE AND
NARCISSISM

How do high-ego personalities drive research
in life sciences?

Cover image: Professor Maurice Carraz, head of the Immunology Department at the Institut Pasteur, Lyon, is seen here with his team in the 1960s. The powerful position of the professor, clearly visible in his black suit, is reinforced by his entourage composed of sixteen, predominantly female, collaborators in white coats. It is difficult to resist the temptation to project the social dominance relationships observed in primate society onto academic life. The cover is adapted from Figure 13. Bibliothèque Municipale de Lyon, Fonds Georges Vermard (1968).

Introduction	1

I An Introduction to the Narcissistic Personality in the Scientific Context

1 An Introduction to Laboratory Life	13
2 An Introduction to Narcissism	21
Typological definitions of narcissism	22
A dimensional definition of narcissism	28
A motive-based perspective on personalities	31
A few more insights to complete the picture	32
Narcissism and situation of power	35
The vulnerable narcissist	36
Concluding remarks	38
3 Detecting Narcissism in Science with Real-Life Examples	41
Niels Jerne, the great seducer	42
Jacques Monod and his hard-core message on science objectivity	45
Walter Gehring and his absorbent personality	49
4 Detecting Narcissism in Science with Fictional Examples	55
The grand mandarin	56
The American operator	61
The visionary scientist	64

Concluding remarks	68
5 The Love Life of Narcissistic Scientists	71

II How Narcissism Affects Scientific Practice

6 Of Personality and Science	81
Are there personality traits associated with scientific inquiry?	83
Narcissism and the assessment of a scientific statement	88
Narcissists and their N-drives	93
Narcissism and fascination	96
Narcissistic strategies for achieving fame in science	102
Impact of N-drive on recognition	111
7 Network, Mafia and the Pipeline of Recruitment	117
Networks and narcissism	118
Leadership in science and narcissism: A pipeline of recruitment	122
Influence of the N-drive on gender equality in science	125
8 Misconduct and Low Communal Investment	127
Narcissists often accommodate reality to their own interests	128
Conflict of interest and narcissism	133
Narcissism and the tragedy of the commons	135
9 The Dilemma of the Meticulous Scientist	139
The importance of meticulous scientists	140
10 Is Self-Analysis Possible for the Narcissistic Scientist?	145

III The Developmental and Evolutionary Roots of Narcissism

11 The Developmental Roots of Narcissism	153
The developmental roots of narcissism	154
Narcissism in the academic world	159
The birth of a genius: Alexander Grothendieck	161
12 Can Evolutionary Psychology Decode Narcissism?	165
Narcissism and social dominance	166

Narcissism and short-term mating	185
Integrating dominance, short-term mating and narcissism	190
Why are humans so diverse in term of personalities?	196
13 Social Dominance Hierarchy in the Laboratory	199
Narcissism and the Matthew effect	201
Can we move away from our biological heritage?	202

IV The Impact of the Rise in Narcissism on Society and Science

14 On the Rise of Narcissism in Western Society	209
Introduction	209
General consequences of a rise in narcissism	211
The narcissism epidemic: Campbell and Twenge’s message	215
The narcissism epidemic: Personal views	223
15 Narcissism and Issues in Contemporary Life Sciences	229
A crisis in life sciences?	229
Getting rid of the bad aspects of narcissism	233
Recognizing narcissistic traits in a scientific context	234
Better control in science practice	238
Recovering a true understanding of science	241
Acknowledge the role of the community	244
Conclusions	246
Final remarks	249
On the rise of narcissism in our society	252
Narcissism in science: Is it good or bad?	253
Michael Polanyi’s message on value	254
A message to young scientists	259
References	261
